Summary

Full-stack Web Developer and AI/ML Engineer with expertise in designing scalable web applications and deploying advanced machine learning models. Proficient in JavaScript, Python, React, Next.js, TensorFlow, and cloud platforms. Delivered projects that boosted user engagement by 30% and improved model accuracy by 20%. Passionate about leveraging technology to create innovative, data-driven solutions for real-world challenges.

Skills

Languages: C, C++, JavaScript (ES6+), Python (Advanced)

Web Development: HTML5, CSS3, React, Next.js, Node.js, Express.js, MongoDB, PostgreSQL, Firebase, Tailwind CSS, Bootstrap, Web Sockets

Software Development: REST APIs, Git, GitHub, Agile/Scrum, VS Code

Machine Learning & AI: Supervised/Unsupervised Learning, NLP, Deep Learning, TensorFlow, PyTorch, Scikit-learn, Pandas, Numpy

Tools & Platforms: Postman, Figma, Vercel, Netlify, Render, Jupyter

Soft Skills: Problem-solving, Teamwork and collaboration, communication, Adaptability, Leadership

Work Experience

- **Machine Learning Intern, Physics Wallah, Virtual** *Dec 2024 – Jan 2025*
  Developed a machine learning model to predict text authorship using NLP techniques and classification algorithms (SVM, Random Forest). Enhanced model accuracy by 20% through advanced feature engineering and hyperparameter optimization. Deployed model via Flask API, processing 10,000+ text samples.

Projects

- **Gymkhana Website:** Developed a full-stack web application using Next.js, MongoDB, and Tailwind CSS to streamline college activity management. Implemented event registration, user authentication, and content management systems, increasing student participation by 30% for 500+ users. Deployed on Vercel.
- **MentorMeet Website:** Built a full-stack mentorship platform using Next.js for the frontend and two backend servers (Next.js API and Node.js). Implemented real-time chat using WebSockets and video calling with Sendbird. Used MongoDB for storing user and session data. Enabled seamless mentor-student interaction for over 200 active users.
- **Next-Word Predictor:** Created an NLP model using Python, LSTM networks, and TensorFlow to predict next words in text sequences. Trained on a 20k-word corpus, achieving 85% prediction accuracy. Optimized model for low-latency performance on CPU-based servers.
- **AI-Powered Code Editor:** Built a web-based code editor using Next.js and Monaco Editor, integrated with Groq API for AI-driven code suggestions. Added voice command functionality via Web Speech API, boosting developer productivity by 20%.

Leadership & Extracurriculars

- **Co-lead, Competitive Programming, IIIT Vadodara - International Campus Diu**
  2023 – Present
  Organized coding workshops and mock contests for 300+ students, enhancing team performance in national competitions like ICPC. Mentored peers in algorithms and data structures, leading to a 20% increase in contest rankings.

Achievements

- Won 1st place in Hackathon (Hack the Future) at IIITV-ICD, leading a team of 4 to develop an AI-driven app in 36 hours.
- Competed in ICPC 2024, ranking in the top 25% regionally.
- 3-Star Coder on CodeChef (max rating: 1760; solved 300+ problems).
- Ranked in top 15% of coders on LeetCode (solved 500+ problems).

Education

- **B.Tech in Computer Science and Engineering, IIIT Vadodara – International Campus Diu** *2023 – Present*
  CPI: 8.99/10. Relevant coursework: Data Structures, Algorithms, Software Engineering.

Certifications

- Full Stack Web Development Bootcamp, Udemy (2024)
- Complete Machine Learning & AI Course, Udemy (2024)
- Microsoft Learn Student Ambassador (Web Dev Workshop)
